

Prime: Management Consulting, Inc.

Customer: Commander, Naval Medical Center, Bethesda, MD

A smaller version of the DOMA Technologies logo, consisting of a grid of orange squares of varying sizes.

DOMA Technologies, as a subcontractor to Management Consulting, Inc. provides onsite Medical Records Coding and Auditing Support services to the National Naval Medical Center, Bethesda, Maryland. Certified professional coding and auditing specialists conduct ICD-9 and CPT-4 coding and auditing for outpatient medical records, clinical visits, and ambulatory procedure visits of patients. Medical records and related documentation may include provider progress notes, abbreviated medical records, diagnoses, procedures, consultations, history and physical examinations, laboratory, pathology, radiology, and nuclear medicine reports. DOMA Technologies provides educational feedback to coders and NNMC physicians addressing inappropriate patterns of documentation and coding to ensure effective training for staff personnel. DOMA provides auditing of coded data, related to provider information, dates of procedures, and patient identifiable information which is entered into the Coding Compliance Editor, AHLTA, CHCS and CIS. DOMA personnel assist in updating patient records; ensuring completion of medical forms and questionnaires; maintaining records of patients treated; quality assurance of medical records in accordance with NNMC regulations; and other assorted clerical and administrative responsibilities.
